

Linda –

Attached are the results of HTS' air sampling. Hope this helps.

Please let me know if you need anything else.

Thanks

Carrie Beringer

Subject: RE: Question on Sampling Data

We are looking for all samples collected as part of the impact assessment from the incident (preferably by media) but in an excel format.

They may have been in various reports.

Hi Linda –

Sorry for the delay – I did not see your email in my inbox. I apologize for the mis-scan of the summary of post incident events. The document is too large to email as one document, so I will need to send this over in two (2) emails. Attached to this email is part 1 of 2.

Also, attached to your "Summary of Post Incident Events" is the "Work Plan to Evaluate the Extent of Ash Release at Heritage Thermal Services East Liverpool, Ohio". Do you need this document as well? It is not part of the Summary report- it is a stand alone document. Please let me know if you need the second document as well.

Thanks and have a nice weekend.

Linda –

Attached is the Work Plan.

Please let me know if you need anything else.

Thanks

Carrie

Hi Carrie,

Thanks for getting back with me. Yes, please send the work plan report as well. Thank you so much.

Hi Linda –

Sorry for the delay – I did not see your email in my inbox. I apologize for the mis-scan of the summary of post incident events. The document is too large to email as one document, so I will need to send this over in two (2) emails. Attached to this email is part 1 of 2.

Also, attached to your "Summary of Post Incident Events" is the "Work Plan to Evaluate the Extent of Ash Release at Heritage Thermal Services East Liverpool, Ohio". Do you need this document as well? It is not part of the Summary report- it is a stand alone document. Please let me know if you need the second document as well.

Thanks and have a nice weekend.

Carrie

Hi Carrie,

Attached is the Heritage Final Incident report that you scanned and sent us. IT appears to be missing every other page. Can you please send us the entire document? Email is fine. Thanks

Colledge, Michelle

Yes, that is what will work. It occurred to me after spending the entire day yesterday scrawling the tables onto notebook paper and entering it into excel that this was likely a waste of time, because surely someone has been paid to do it already.

Ok so I will ask them for all samples collected as part of their release investigation in excel format. Will that work?
 You're right. I would be surprised if they didn't have it.

Subject: RE: Question on Response to EPA's Information Request - Work Plan

All data you want me to analyze. There are hundreds of soil/sediment/sludge samples, as well as some air samples...maybe other stuff?

Maybe just ask for all samples collected as part of their release investigation... I can almost guarantee their contractors provided not just the lab reports, but also an electronic version of the data. The pdfs are helpful, but some of them are 100% duplicates, some of them contain some of the same samples that others contain, etc.

Subject: RE: Question on Response to EPA's Information Request - Work Plan

Ok. but what exactly do you want in excel. Is it the data from a certain report or reports and if so what are they. I have to be extremely precise with them.

Subject: RE: Question on Response to EPA's Information Request - Work Plan

It would be best-and if they have written reports they have the data in an electronic format someplace. This will take me weeks, substantially slowing down how quickly I will be able to get you something.

Hi Michelle,

Thanks for letting me know. So sorry that it is involving so much work. If you would like I may be able to ask the company and see if they will put it into Excel for us. I would have to know exactly what data you wanted them to put in there and then I don't know how long it would

Take them if they haven't done it already. Let me know.

Linda-

Update-It is going to take me longer than I thought to get all the data into an analyzable format (Excel). I am wading through hundreds of pages of reports and transcribing things by hand. If you do this again, you might suggest all data in excel.

Just an FYI

Thanks for the information Michelle. I actually issued them a Request for Information and received a lot of analytical information.

My supervisor, Nathan Frank, was wondering if you could work your magic and find out what type of risk the ash spill may have caused the community.

There were a lot of metals and so forth in the material. I could provide everything to you.

Hi Linda-

I'm so sorry I haven't responded to your email-I thought I left you a voice mail message about this... I have never been in contact with the company on this issue. I received some data, and I'll forward it to you. I did speak with a residents who is concerned about the ash, Mike Walton.

Let me look through my email and see if I can forward you any data I have received. I am home sick today and don't have access to all my files.

We can discuss next week if you have any other questions.

Thanks,
Michelle

Hi Michelle,

I am the Air Enforcement Engineer in charge of investigating this case. I sent a Request for Information to the company and I see your name as someone who was in contact with them regarding the explosion incident on July 13, 2013. I was

wondering what type of involvement you have in the case. I have extensive soil sampling results from the company, ambient air testing.

Have you looked at any of this to see what negative health ramifications there might have been? I also saw in one of their letters or emails about a toxicology report but I am still looking for that...

I would really like to hear your thoughts on the case.

Thanks so much.

Linda H. Rosen
